

Our Fall Protection Series Skylight Fall Screens (Interior) are an ideal cost effective and easy-to-install solution to protect from accidental falls through skylights. The use of a Skylight Fall Screen eliminates the potential danger that exists with unguarded skylights and creates a safe working environment for all rooftop services. Built entirely from North American sourced, high grade materials, this product is manufactured from heavy gauge, anti-corrosive galvanized steel with strong heliarc welds to meet OSHA requirements for skylight coverings\*.

\*It is the sole responsibility of the customer to ensure that the product selected meets the building codes for the jurisdiction in which they are being installed.

Artistic Skylight® offers the widest range of customization with multiple sizing available and can be customized to fit almost any project application.

FPS-FS CUST.		

**Specifications:**

This particular Skylight Fall Screen model is installed on the interior of the skylight. It features a slim, flat profile design, easy for transportation and aesthetically pleasing. Its mounting system is installed on the topside of the roof curb, on the interior of the skylight shaft. This design is extremely versatile in adapting to any size curbs making it ideal for both newly installed and existing applications.
