UPDATED SEPT. 2019

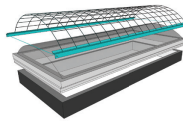

# Product Feature Sheet

## Skylight Fall Screens

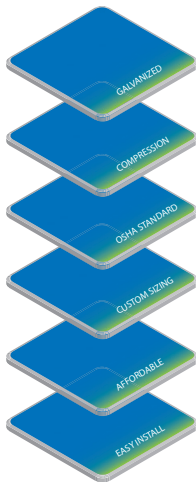

### Overview

Our FPS (Fall Protection Series) **Skylight Fall Screens** are an ideal cost effective and easy-to-install solution to protect from accidental falls through skylights. The use of a Skylight Fall Screen eliminates the potential danger that exists with unguarded skylights and creates a safe working environment for all rooftop services<sup>2</sup>.

The **Skylight Fall Screens** are a non-penetrating installation and do not penetrate the roof or curb membranes, thereby maintaining the integrity of the roof and its respective warranty. Because of this design, our **Skylight Fall Screens** are not limited to only newly purchased skylights, but rather can be adapted to older applications as well<sup>1</sup>. Sizing can be customized to fit almost any project application.

### Features

Galvanized Steel Construction To Resist Corrosion

Rigid Compression Design Fits Exterior Skylight Frame

Meets OSHA Requirements For Skylight Coverings<sup>2</sup>

Standard and Custom Sizes Available

Affordable And Compliant Protection<sup>2</sup>

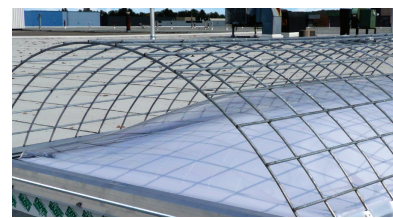

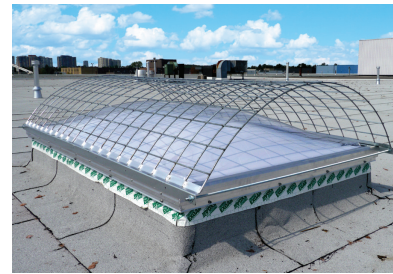

Quick and Easy On-Site Installation

### OSHA Skylight Requirements

The Occupational Safety and Health Act (OSHA) requires that employers provide fall protection as stated in the regulations listed below:

1926.501 (b)(4)(ii)	1926.501 (b)(4)(iii)
Each employee on a walking/working surface shall be protected from tipping in or stepping into or through holes (including skylights) by covers.	Each employee on a walking/working surface shall be protected from objects falling through holes (including skylights) by covers.

<sup>1</sup>Please note that some applications may vary.  
<sup>2</sup>Responsibility of the customer to ensure that the product selected meets the building codes for the jurisdiction in which they are being installed.

### Custom Sizing Available

Project specific sizing available for retrofitting existing standard and/or custom sized skylights .
